I organize information so people can find what they need. For five years I alone ran a 3,000-article knowledge base and help chatbot for 10,000–20,000 employees, using library-science methods: cataloging, controlled vocabulary, scheduled review and weeding. Earlier I worked in customer escalations, reporting and training, and ran a fine-art print studio. I'd like to bring that to a library, museum, or independent bookstore or game shop.

EXPERIENCE

Foundever (formerly Sitel Group)

Las Vegas, NV & remote · 2012 – 2025

Project Architect: Intranet & Knowledge Base, North America

July 2020 – October 2025

Internal title "EverConnect Architect." Sole architect for 40–50 US and Canadian sites. The role was eliminated in a reduction in force.

- Ran a collection of about 3,000 articles: taxonomy, audience permissions, metadata and a recurring review cycle.
- Designed the "Directory," a Smartsheet catalog that assigned a subject-matter expert to every article. It sent automated reviews every 7 to 300 days using a MUSTIE-based checklist, kept an audit history, and produced the intranet index (HTML), chatbot topics (JSON) and AI reference files (Markdown).
- Owned the North America Cognigy chatbot (about 1,000 users a day, mostly HR questions about timecards, PTO and leave). Designed it like a reference desk that points people to the current official article instead of answering from memory.
- Recruited, trained and supported 30–100 content "Creators" (HR, support staff, managers, subject-matter experts). Ran outreach that replaced separate site-by-site SharePoints and reached an estimated 80% monthly active use.
- Built the "Dictionary" glossary, ran the region's internal ChatGPT assistant, and project-managed the Internal Communications team.

Continuous Improvement Manager, North America

September 2019 – July 2020

- Was the first member of a rebuilt Continuous Improvement team. Supported and retrained site reporting analysts on investigations, metrics and tools (BusinessObjects, Power BI, SharePoint), and served as the team's de facto project manager.
- Was one of three regional members of the global intranet design committee. Surveyed employees worldwide, evaluated vendors, and recommended an in-house build because no vendor met PCI and HIPAA requirements.

Operational Reporting Analyst, Las Vegas

April 2013 – September 2019

- Updated the daily margin tracker (revenue and cost of sales against monthly forecasts) and prepared month-end client invoices.
- Supervised the site's Quality team, Workforce team (real-time analysts) and another reporting analyst. For a time, was the only operational reporting analyst left in North America.
- Built automated reports in Excel, Access and SQL, and ran internal communications and the SharePoint site for the Las Vegas site.

Special Customer Support (Tier 3), Beats by Dre

June 2012 – April 2013

- Joined Beats by Dre's customer service program at launch. Wrote guides for other agents and improved how the team used the Oracle RightNow CRM, which led to becoming the program's first Tier 3 agent.
- Handled injury claims (including spotting fraudulent ones), Better Business Bureau complaints, client escalations, lost-package investigations and the most difficult repeat customers.

Art From the Heart

Art studio & print shop · Las Vegas, NV

Printer, Photographer, Designer

January 2006 – January 2009

- Ran the studio's print shop as its only employee. Photographed original paintings (Canon 5D, softbox lighting, color reference targets) and produced fine-art giclée reproductions on a wide-format printer.
- Developed the color-matching workflow (color profiles for each material, calibrated monitor), and designed cards for local artists.

Other Experience

Freelance Graphic Designer (2009–2012) · Cashier, Shell (2011–2013) · Crew Leader, NWTEC (2005–2006) · Line Cook, Timbers (2003–2005)

PROJECTS & COMMUNITY

- **Terrablox**: a voxel-based virtual tabletop for roleplaying games, built solo in Godot 4 and now in Steam review.
- **TMT (T's Musical Tools)**: open-source modules for the VCV Rack modular synthesizer, with about 4,000 downloads. Includes RhythML, a plain-text sequencing notation I designed and documented.
- Organized a weekly fighting-game meetup, and have moderated online communities for years. Lifelong reader of science fiction, fantasy and nonfiction. I own about 100 board games and play Magic: The Gathering, Netrunner and Warhammer.

SKILLS & EDUCATION

Information: Cataloging and metadata, taxonomy and controlled vocabulary, collection review and weeding (MUSTIE), reference and wayfinding, content management, documentation

People: Customer service and escalations, training and onboarding, supervising, community outreach and events

Creative: Photography, color management, large-format printing, print layout, graphic design, video editing

Tools: Smartsheet (advanced), Excel, SharePoint, Power BI, SQL, RightNow CRM, Cognigy, ChatGPT, Photoshop, Illustrator, HTML/CSS, Python

Education: Media Arts & Animation coursework (3.5 years), Art Institute of Las Vegas · Lean Six Sigma Green Belt (2019)
